

Tutankhamen fab tomb found!

Yesterday, on the 22nd of November Howard Carter accomplished the finding of Tutankhamen Tomb in the valley of the king's . He looked for the to tomb for the tomb for over 20 years and not giving up and he was hoping it was not robbed when he found it.

Our report starts with Howard Carter working with Theodore Davis in 1901. They were trying to find tombs of Pharaohs. Carter discovered a tomb but unfortunately, it was empty. Afterwards, Davis stopped working with Carter because he felt Carter had made a fool of him.

Following this in 1905 Carter met Lord Carnavon and started digging outside the Valley of the Kings because they didn't have a permit.

Finally, in 1914 Lord Carnavon brought the permit because Davis reported that there was nothing left to find in the Valley of the Kings. Carter was still working with the Lord. Without a warning

between 1914-1918 World War I broke out.

Eventually in 1919 the excavating started again. Carnavon still had the permit and Carter still worked for him. They dug for 3 years until the water boy found a step. This led to a blocked doorway. A telegram was sent to Lord Carnavon immediately , the Lord was in England at that time and rushed to Egypt with his daughter, Evelyn.

They went inside of the tomb, but first they made a small hole to let out any poisonous gasses. Carter looked through the hole. Carnavon asked " can you see anything"? "yes wonderful things". They went into the antechamber and found many artifacts and items made from gold . They found a door way to Burial Chamber to that Tut was inside the shrine that was made of gold . His sagoteghus was in side.

All the artifacts will de taken to the museum of Cairo and will be on display to the public.

Tutankhamen sarcophagus.
